

JEEVANRAJ L

ASPIRING AI & ML INTERN

+91 7094011675 | jeevaneniyavan@gmail.com | [LinkedIn](#) | [GitHub](#) | Thanjavur

OBJECTIVE

Passionate Computer Science student with hands-on experience in Machine Learning and AI-based projects, seeking an AI Intern role to enhance my skills in model development, data processing, and real-world AI applications. Eager to apply strong analytical and problem-solving abilities to build efficient, data-driven solutions, while gaining practical industry exposure. Committed to continuous learning, and contributing to innovative and impactful projects within a dynamic organization.

TECHNICAL SKILLS

Programming Languages : Python, Java, C

Frontend & Backend Frameworks : ReactJs , HTML, CSS , Node.js , FastAPI

Databases & Platforms : SQL , MongoDB , Supabase , Firebase NeonDB

Machine Learning Libraries : Numpy, pandas, Scipy, Matplotlib, Seaborn , ScikitLearn ,etc..

AI & Frameworks : NLP , LLM ,LangChain , LangGraph , RAG , CrewAi

VibeCoding : Lovable , Qoder , Antigravity , Claude

Problem Solving in DSA : Leetcode, GeeksForGeeks

PROFESSIONAL EXPERIENCE

Software Engineer Intern :

The Yellow Network (3 Months):

- Developed an AI-based HR chatbot to automate employee and candidate queries to HR.
- Implemented AI frameworks to control the workflows of chatbot.
- Integrated a knowledge base for HR policies and FAQs for accurate responses.
- Built a user-friendly web interface for employee (chatbot) and HR dashboard for seamless interaction
- Improved response time and reduced manual workload for HR operations.

Technologies: LLM, NLP, RAG ,LangChain,LangGraph , React , FastAPI, NeonDB , S3.

PROJECTS

1.Step-up-Learning:

- Developed an AI-based chatbot that enables students to upload books and learn by asking queries
- Implemented Knowledge base to retrieve relevant content from documents instead of directly querying the LLM .Provided accurate, context-aware answers based on student-uploaded materials, improving personalized learning experience.

Technologies: React, FastAPI, MongoDB, LLM (Groq), RAG

2.Customer Churn Prediction (ML):

- Developed a machine learning model to predict customer churn using data preprocessing, feature engineering, and classification algorithms
- Handled imbalanced data using techniques like SMOTE and evaluated model performance using accuracy, confusion matrix, and classification metric. Built a system to help identify high-risk customers, enabling better decision-making for customer retention.

Technologies: ScikitLearn , Pandas, Numpy, Matplotlib, Streamlit , Pickle.

EDUCATION

Bachelor of Engineering: 2023 -27 | Government College of Technology - Coimbatore Computer Science and Engineering - CGPA : 7.8

CERTIFICATION

LearnTube - Python basic , Advanced ,DSA | Naan Mudhalvan -ML,Data Analytics | GFG 160 Days of DSA
